

The background features several 3D rendered COVID-19 virus particles. One large, detailed particle is on the left, showing its characteristic spherical shape with numerous spike-like protrusions. Other smaller, more translucent particles are scattered across the light blue and green background.

COVID-19
CORONAVIRUS

INFECTII NOSOCOMIALE

COVID - 19

Pandemia de coronavirus din România este o epidemie aflată în curs de desfășurare pe teritoriul României cauzată de noul coronavirus 2019-nCoV (SARS-CoV-2), virus care provoacă o infecție numită COVID-19, care poate fi asimptomatică, ușoară, moderată sau severă. Infecția severă include o pneumonie atipică severă manifestată clinic prin sindromul de detresă respiratorie acută.

COVID - 19

In data de **13.04.2020** Spitalul Clinic Municipal de Urgenta Timisoara devine spital –suport Covid prin infiintarea sectiei **DERMATOLOGIE SUPTOR COVID** cu 42 de paturi.

In data de **21 februarie 2020** se depisteaza primul caz de infectie Sars Cov2, o mamica insotitoare a unui nou-nascut de pe sectia de neonatologie.

COVID – 19

The background of the slide features several 3D rendered COVID-19 virus particles in shades of green and yellow, scattered across a light blue and white gradient. On the right side, the text "COVID-19" is written in a large, white, sans-serif font, with "CORONAVIRUS" written below it in a smaller, white, sans-serif font.

Din data de 15 martie 2020 si pana in 31 decembrie 2020 in spitalul nostru au fost tratati un numar de **660** de pacienti infectati cu virusul Sars Cov 2.

Dintre acestia, **75** au decedat.
